DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/28/2007 has been entered.

Response to Arguments

2. Applicant's arguments, see page 3, in combination with the amendment filed 5/28/2007, with respect to claims 1-4 and 6-8 have been fully considered and are persuasive. The rejections of claims 1-4 and 6-8 has been withdrawn.

3. Heflinger et al do not disclose or render obvious a receiving fiber and a pump guiding fiber having an attachment section comprising a straight core section and a tapered core section wherein a length of the straight core section that is attached to the receiving fiber is at least as long as a length of the tapered section that is attached to the receiving fiber.

4. Pages 5 and 6 of applicant's specification explain why a significant length of straight core section is critical to applicant's invention. Specifically, the significant length of the straight core section allows for efficient matching of high order modes.

Allowable Subject Matter

5. Claims 1-4 and 6-8 are allowed.

6. The following is an examiner's statement of reasons for allowance:

Art Unit: 2883

7. Claim 1 is allowable over the prior art of record because the latter, either alone or in combination, does not disclose nor render obvious an optical apparatus comprising a pump guiding fiber comprising an attachment section, said attachment section comprising a straight core section and a tapered core section and a receiving fiber comprising an inner clad to which said straight core section and said tapered core section are attached, wherein a length of said straight core section that is attached to said receiving fiber is at least as long as a length of said tapered core section that is attached to the receiving fiber in combination with the rest of the claimed limitations.

8. Claims 2-4 and 6-8 are dependent upon claim 1 and are thereby allowable for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
